

**St. Joseph's College of Nursing
at St. Joseph's Hospital
Syracuse, New York**

CREDIT TRANSFER WORKSHEET

This chart is intended to assist you in identifying appropriate, similar courses at another college or university. Locally, Onondaga Community College (OCC) and Cayuga Community College (CCC) offer transferrable courses from the St. Joseph's curriculum listed below. Courses available online @ www.portagelearning.com.

Transfer credit may be awarded for college courses that were completed previously, passed with a grade of "C" (2.0) or better and that are similar in content, rigor, expected learning outcomes, and credit hours to those in the St. Joseph's curriculum. College science courses (A&P, Micro) completed more than seven (7) years prior to acceptance will need to be repeated.

Courses listed under St. Joseph's Curriculum are offered through our affiliate Le Moyne College.

St Joseph's Curriculum	Credit Hours	Course Description	What to look for at another college/university
BSC 201 Anatomy & Physiology I	4	This course is the first in a two-semester sequence providing a study of anatomy and physiology in the human body. Initial portions of the course will include terminology, cell biology, biological chemistry, and tissues. Body systems covered include the skeletal, muscle, nervous, and integumentary. The cat is the primary dissection specimen in the laboratory. Dissection required.	Similar course description/title. Must include a lab. OCC = BIO 171; CCC = BIO 203
BSC 202 Anatomy & Physiology II	4	This course is the second in a two-semester sequence providing a study of anatomy and physiology in the human body. Topics covered include the special senses, and the endocrine, circulatory, immune, respiratory, digestive, urinary and reproductive systems. Dissection required.	Similar course description/title. Must include a lab. OCC = BIO 172; CCC = BIO 204
BSC 205 Microbiology	4	This course is a survey of microbial life with special emphasis on those organisms of clinical interest. Laboratory exercises emphasize the isolation, identification and control of microorganisms.	Similar course description/title. Must include a lab. OCC = BIO 205; CCC = BIO 216
WRT 101 Critical Writing	3	Practice in the skills of critical thinking, critical reading and especially critical writing. Students will analyze selected essays and articles in conjunction with frequent writing assignments. Students will be expected to gain and demonstrate college-level proficiency in critical reading, critical writing and standard English grammar and usage.	Similar course description. Must include composition or a writing component. OCC = ENG 103/104; CCC = ENG 101
PSY 101 Introductory Psychology	3	A one-semester broad overview of contemporary psychology – its diverse approaches to the understanding of behavior and basic principles and research findings associated with each of these approaches. Specific areas of psychological inquiry discussed include physiological, cognitive and social psychology; learning, sensation and perception; emotion and motivation; and personality and psychopathology.	Similar course description/title. OCC = PSY 103; CCC = PSY 101
PSY 220 Human Life Span Development	3	This course is a general introduction to human development. The study of human development is a scientific analysis of patterns of change and growth across the entire life span from conception through very old age. The course will include the investigation of essential questions of human experience, including inherited factors, attachment to caregivers, mastery of the human body and the environment, meaningful social relationships, achievement, occupational choice, impact of societal expectations, the formulation of values and goals, the concept of generativity, and death and dying. The course will analyze human development from a biopsychosocial perspective looking closely at basic patterns of normal development.	Similar course description/title. May be titled "Growth & Development" or "Human Growth & Development" or "Life Span Psychology" OCC = PSY 206; CCC = PSY 212
SOC 101 Introductory Sociology	3	An introduction to sociology's contributions toward an understanding of men and women and their social world. The course examines social interaction as the basis of social behavior and the foundation of social groups. Sociological concepts and methodology are used to provide meaning and understanding of such phenomena as gender roles, the development of self, the family, social class and stratification, deviant behavior, behavior in organizations and bureaucracy, urban life, power and politics, and social change.	Similar course description/title. OCC = SOC 103 or ANT 103; CCC = SOC 101
PHL 346 * Ethics & the Nurse	3	Using a practical, context-specific approach that is sensitive to the philosophical, scientific, social, legal and economic dimensions that shape and define the field of bioethics, this course is devoted to a detailed study of ethical issues in nursing. Specific topics will vary.	Similar course description/title. Must focus on nursing and healthcare ethics.
