PSY 220 Human Life Span Development 3 Credit Hours	This course is a general introduction to human development. The study of human development is a scientific analysis of patterns of change and growth across the entire life span from conception through very old age. The course will include the investigation of essential questions of human experience, including inherited factors, attachment to caregivers, mastery of the human body and the environment, meaningful social relationships, achievement, occupational choice, impact of societal expectations, the formulation of values and goals, the concept of generativity, and death and dying. The course will analyze human development from a biopsychosocial perspective looking closely at basic patterns of normal development.	May be titled <i>“Human Growth & Development”</i> or <i>“Growth & Development”</i> OCC: PSY 206 CCC: PSY 212 Portage Learning: PSYC 140
SOC 101 Introductory Sociology 3 Credit Hours	An introduction to sociology’s contributions toward an understanding of men and women and their social world. The course examines social interaction as the basis of social behavior and the foundation of social groups. Sociological concepts and methodology are used to provide meaning and understanding of such phenomena as gender roles, the development of self, the family, social class and stratification, deviant behavior, behavior in organizations and bureaucracy, urban life, power and politics, and social change.	OCC: SOC 103 or ANT 103 CCC: SOC 101 Portage Learning: SOCI 180
