

ST. JOSEPH'S COLLEGE OF NURSING

TRANSFER CREDIT WORKSHEET

This chart is intended to assist you in identifying appropriate, similar courses at another college or university.

Transfer credit may be awarded for college courses that were completed previously, passed with a grade of "C" or better, and similar in content, rigor, and credit hours to those in the St. Joseph's curriculum.

College science courses must be completed no more than seven (7) years prior to acceptance.

ST JOSEPH'S CURRICULUM & CREDIT	COURSE DESCRIPTION	APPROPRIATE SIMILAR COURSE
BIO 101 Human Anatomy & Physiology I, with Lab 4 Credit Hours	This course explores human anatomy and physiology with an emphasis on concept application. Students develop an integrated understanding of how body systems maintain homeostasis and health, beginning with cellular and tissue organization and progressing through the integumentary, skeletal, muscular, nervous, and sensory systems. Through lecture and laboratory experiences, students investigate structural and functional relationships within and between organ systems, explore how physiological processes sustain life, and examine how disruptions can impact overall health.	Le Moyne: BSC 201 OCC: BIO 171 CCC: BIO 203 Portage Learning BIOL 251
BIO 102 Human Anatomy & Physiology II, with Lab 4 Credit Hours	This course continues the exploration of human anatomy and physiology with a focus on the coordination and regulation of body functions. Students build on foundational knowledge to investigate the endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems. Emphasis is placed on the integration of these systems in maintaining homeostasis and supporting human health. Through lecture and laboratory experiences, students examine structural and functional relationships, explore the physiological mechanisms underlying system interactions, and consider how imbalances or disruptions can lead to disease or dysfunction.	Le Moyne: BSC 202 OCC: BIO 172 CCC: BIO 204 Portage Learning: BIOL 252
BIO 201 Microbiology, with Lab 4 Credit Hours	Microbiology introduces students to the biology of microorganisms and their relevance to human health, disease, and the environment. Topics include microbial structure and function, metabolism, genetics, immunity, pathogenesis, and microbial control. The course supports the development of scientific reasoning and foundational microbiological concepts relevant to healthcare, public health, and environmental contexts. Laboratory activities, virtual and in-person, develop core microbiological skills and reinforce safety, identification, and data interpretation techniques.	Le Moyne: BSC 205 OCC: BIO 205 CCC: BIO 216 Portage Learning: BIOL 271

ST JOSEPH'S CURRICULUM & CREDIT	COURSE DESCRIPTION	APPROPRIATE SIMILAR COURSE
PSY 101 Introductory Psychology 3 Credit Hours	Introductory Psychology is a 3-credit course designed to provide you with a broad overview of contemporary psychology, its diverse approaches to the understanding of behavior, and the basic principles and research findings associated with each of these approaches. Specific areas of psychological inquiry discussed include physiological, cognitive, and social psychology, learning, sensation and perception, emotion and motivation, personality, and psychopathology. This course is a prerequisite for most psychology courses and nursing courses.	OCC: PSY 103 CCC: PSY 101 Portage Learning: PSYC 101
PSY 220 Human Growth and Development 3 Credit Hours	This course provides an in-depth exploration of human development across the entire lifespan, from conception to late adulthood. Students will examine the physical, cognitive, and psychosocial changes that occur at each stage of life. Emphasis is placed on major theories of development, research methods, and the interplay of biological, psychological, and sociocultural factors influencing growth. Topics include prenatal development, infancy, childhood, adolescence, adulthood, and aging, as well as issues related to family, education, and cultural diversity. By the end of the course, students will gain a comprehensive understanding of developmental processes and their practical applications in personal and professional contexts.	OCC: PSY 206 CCC: PSY 212 Portage Learning: PSYC 140
SOC 101 Introductory Sociology 3 Credit Hours	This course introduces students to the basic principles, concepts, and perspectives used in sociology to study human society systematically. Students will learn to think sociologically by examining how social patterns, institutions, culture, and inequality shape individual and group behavior. Emphasis is placed on developing critical thinking skills and social awareness by applying sociological theories and concepts to contemporary social issues.	OCC: SOC 103 or ANT 103 CCC: SOC 101 Portage Learning: SOCI 180
WRT 101 Critical Writing 3 Credit Hours	Practice in the skills of critical thinking, critical reading and especially critical writing. Students will analyze selected essays and articles in conjunction with frequent writing assignments. Students will be expected to gain and demonstrate college-level proficiency in critical reading, critical writing and standard English grammar and usage.	OCC: ENG 103/104 CCC: ENG 101 Portage Learning: ENGL 101
